

About the profile concepts

CREATE Personal site:

To create a personal site , user need to edit their PERSONAL PRIVATE INFORMATION

CREATE a company, and e-commerce site

To do that the user want to create a company and e-commerce site need to edit two different profile

- 1) Account profile= Personal Profile:** Content the information regarding the activities of the user inside the company.
- 2) Company profile:** Content the information about the company

The Lateral Menu:

On the platform we need to get only ONE MENU instead several menu according to the commercial plan

Tha mode allow ALL THE USER TO UNDERSTAND the different action according to the Commercial plan

If the user want to go to function not included in his plan it should read THIS IS NOT AVAILABLE FOR YOUR PLAN. PLEASE UPGRADE, or CONTINUE , and the user can continue to work with the subscribed plan

CLICKING on UPGRADE the platform open the page for PLAN UPGRADING.

The lateral menu must remain open on the work section the user is working on. User can hide or open the menu. Moreover it can be usefull to show the process sequence : example:

Personal Profile > Your account

Every function should be available for the user according to their Commercial plan.

Function available for the user can be show in BOLD and the other function not availables for the user in standard character

NOTE on the Personal Profile please add **BUSINESS SECTORS I'M INTERESTED IN** and **LANGUAGES** as appear on the attached file maintaining the existing solution as appear on the demo Gdoox site
